# Stop Working Overtime to Manage Overtime

OTSolved™ is the innovative cloud-based scheduling platform that organizes, optimizes and simplifies the management of overtime. It’s the smart way to transform the labor-intensive, time-consuming task into an efficient system that lowers costs, prevents overtime abuse and reduces costly consequences. With these tools, police, fire departments and government agencies can create policies and procedures for overtime use, and monitor and analyze the data to identify issues and control spending.

Unique features of the platform include allowing users to easily create and manage their individual profiles and request over-time with one button on their dashboard. The system also records and reports on vacation, sick time and compensatory time and displays the overview on an accrued time panel. A key feature of the software is an integrated time clock that records data for easy export into other reporting systems.

## MOBILE APPLICATION

- ➔ Check scheduled assignments
- ➔ Accept and reject OT jobs
- ➔ New Requests

Utilizing the latest mobile app and software technology, OTSolved™ communicates with staff and administrators through phone calls, text messages and email to allow for timely and efficient scheduling of overtime job assignments. The fully-customizable solution reduces the time it takes to fill assignments and maximizes the use of resources. By using OTSolved™, organizations can increase worker morale by administering a transparent solution that gives employees greater control over their work and personal time.

## The OTSolved Difference

Accept overtime opportunities by phone, text or web

Vacation, Schedule, and overtime tracker

Bid on overtime opportunities in advance

Check your location in overtime queue

Alerts for upcoming overtime opportunities

Job Swap

Your custom overtime rules

Overtime reports

Reduce administration overhead
